

Title: Cardiac Critical Care: Single Ventricle Management - From Fetus to Fontan

Sponsored by: Pediatric Cardiac, Intensive Care society (www.PCICS.org)

Organizers: Paul Checchia; pachech@texaschildrens.org; David Cooper; david.cooper@cchmc.org

Date and time: Sunday June 5th, 0800-1300

Location: MTCC 715A

Objectives: This workshop is designed to update both the acute and long term management of the single ventricle patient. Specific issues to be addressed will be the pre and postoperative care delivery across the palliative spectrum. Additionally, issues which deal with long term, meaningful outcomes of patients with single ventricle physiology will be addressed.

Intended Audience:

Any practitioner who comes in contact with a patient with single ventricle physiology from fetus to adult survivor.
