

Title: TRAINEE SIMULATION BOOT CAMP

Organizer: Briseida Mema briseida.mema@sickkids.ca

Date and time: June 5th 0830-1300

Location: MTCC 717B

Objectives: The format of this workshop is that of eight simulation scenarios that include several essential skills for Pediatric Critical Care trainees such as: enacting crises situation, troubleshooting mechanical ventilation difficulties, neurotrauma, procedural skills, education and communication skills to name a few. Cases are prepared and facilitated by international faculty with a wide expertise in education and simulation methods. Trainees will perform the scenario in groups of 4-6. Debrief with trainees will occur shortly after the scenario is completed. Materials regarding the cases will be distributed to trainees after the workshop.
